

バッテリー再生延命器

Nanopulser

CUSTOMER DATA (PG-12N)

11th Aug 2009

Voltage 12.28v
CCA 966
Impedance 3.12mΩ

10th Sep 2009

Voltage 12.33v
CCA 1069
Impedance 3.01mΩ

8th Nov 2009

Voltage 12.45v
CCA 1180
Impedance 2.71mΩ

NAME :	DON M HO
VEHICLE MODEL :	BMW 740Li (twin turbo)
NANOPULSER MODEL :	PG-12N
INSTALLATION DATE :	11 th AUGUST 2009
BATTERY TYPE :	VARTA MF 90Ah
OBSERVATIONS :	<p>Baseline reference was done on 11th Aug using Digital Battery Analyzer before Nanopulser installation.</p> <p>① CCA has improved by 22% and impedance has improved by 23% over <u>80 days</u> of usage</p> <p>② customer was able to start the vehicle with one crank after <u>more than 20 days</u> of stationary parking from overseas travels</p> <p>③ customer has noted that fuel economy had improved by <u>3.9%</u> after 3½ months of daily driving (no change in fuel grade)</p> <p>④ customer feedback stating that engine response & power delivery was better than initial car delivery from dealership</p> <p>⑤ brand new conditioned battery will continue to maintain & deliver optimal performance under all driving conditions with long service life</p>
